ABOUT OUR TOPPINGS AND CRUSHED ROCK

Our Toppings are designed for both the home gardener and landscaper in mind. Toppings are a great alternative to concreting or asphaltting your driveways, pathways or open spaces. Toppings are a simple inexpensive way to brighten up an otherwise dull area.

When constructing your area, we recommend that you have a minimum depth of 8cm. 5cm for a base and 3cm for toppings. (see our How To Lay Toppings Sheet).

****DO NOT use weed mat in conjunction with this product****
