

Through extensive research and development, Lilydale Instant Lawn have formulated the new Super Starter Pack! With the combination of Good Bacteria, NPK Fertiliser, Sir Launcher and liquid Lawn Rescue (a blend of kelp and trace elements), this is a complete support cycle for your new lawn, designed to maximise establishment throughout the harsh winter period.

This unique blend is only available directly from Lilydale Instant Lawn.

INSTRUCTIONS FOR THE INSTALLATION OF YOUR LILYDALE INSTANT LAWN SUPER STARTER PACK.

- 1.** Put on your Lilydale Instant Lawn gloves.
- 2.** Begin by opening your NPK bag (blue coloured product) and evenly spread the blue NPK pellets using your hands over your entire prepared soil area. Ensure that you use all of the supplied product as this has been carefully calculated to cover your lawn area with a correct application rate.
- 3.** Open your bag of Good Bacteria (dark brown coloured product) and evenly spread the Good Bacteria pellets over the prepared soil & NPK area using your hands. Again ensure you use all the supplied product to get a complete coverage and correct application rate for your lawn's area.
- 4.** Open your bucket of Sir Launcher spread the Sir Launcher pellet mixture using your hands over your prepared soil, NPK and Good Bacteria according to the application rates supplied on the Sir Launcher bucket label
- 5.** Lay the turf according to the instructions supplied by Lilydale Instant Lawn (available also on our website www.lilydaleinstantlawn.com.au)
- 6.** Attach the Lawn Lovers Rescue bottle onto your hose. Your Lawn Rescue bottle will cover 150m². Simply spray your entire lawn area using only the portion of Lawn Rescue suited for your area. Eg. If you have a lawn area of 50m² only use a third of the bottle.
- 7.** Your Super Starter Pack application is now complete.
- 8.** If you have any Lawn Rescue liquid remaining, simply reapply at the same rate in Step 6 above, every two weeks after your lawn installation until all Lawn Rescue liquid has been used.
